## NOTICE: HUNTER ORANGE REQUIREMENT FOR HUNTING:

All persons hunting any wildlife species (except turkey and migratory birds (including crows) and while hunting legally designated species during legal nighttime hours) during dates and in areas open by regulation to gun deer season to include special youth gun deer season and special muzzleloader deer season are required to wear an outer garment above the waist with a minimum of 144 square inches of hunter orange or either a full size hunter orange hat or cap. Hunters are not required to wear hunter orange when hunting from a stand elevated twelve (12) feet or more from the ground, when hunting in an enclosed box stand, when traveling in an enclosed vehicle, or when traveling on foot no more than twenty (20) feet directly between an operating enclosed vehicle and a stand where the hunter is exempt from the hunter orange requirement. The hunter orange must be worn when traveling on foot between an operating enclosed vehicle and exempt stand when the distance is more than a direct distance of twenty (20) feet. A small logo and/or printing is permitted on the front of hunter orange caps; otherwise, hunter orange must be of solid color and visible from any angle. Only hunter orange, commonly called blaze orange, ten-mile cloth, etc., is legal. The various shades of red as well as camo orange are not legal.

## **OPEN PERMIT-PUBLIC LAND:**

Open Permit-Public Land is defined as governmentally owned land open for public hunting and/or lands made available to the public on an individual basis whether for a fee or not. Examples of such lands would be U.S. Forest Service lands, lands owned by lumber companies and utility companies available for use by hunters either through free permits, fee permits or no permit requirement. This does not include Alabama's Wildlife Management Areas. See the 2018-19 Wildlife Management Area Map Permits for information.

### HUNTER SAFETY RECOMMENDATION:

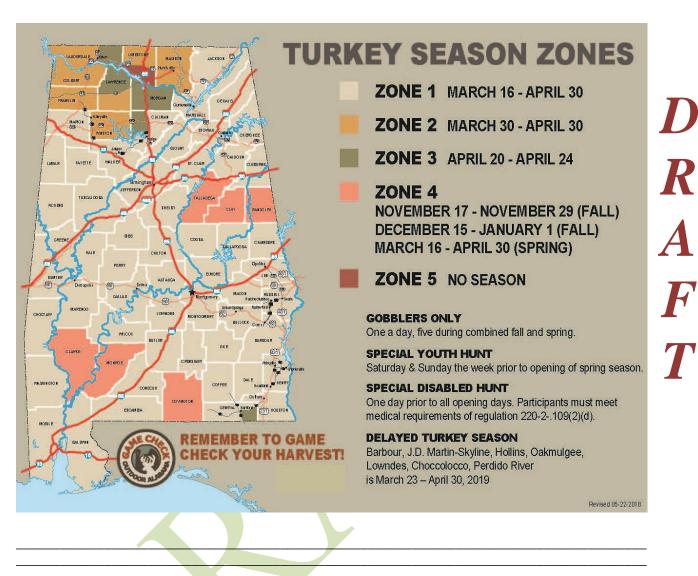

Many hunters travel to and from their hunting area, tree stand, or blind just before dawn and after dusk. It is recommended that hunters use a small pen light while traveling to and from their stands or hunting area. There is also a small red flashing light that can be purchased that pins to a hat or other visible area. Use of a small light will help with the problem of identification of hunters during low light condition. This recommendation does not legalize the use of lights to illegally hunt game animals.

### TREE STAND SAFETY RECOMMENDATION:

Falls from tree stands are the most common hunting accidents. Serious injury and death are likely to occur from such a fall.

It is strongly recommended that no one hunt from an elevated stand without using a full body safety harness.

Full body harnesses are required when hunting from an elevated stand on a Wildlife Management Area.
